Claridge® Digital Ready™ Markerboards
Enable Interactivity in Minutes

Digital Ready Markerboards bridge the gap between marker-based and interactive whiteboards. For those who want to gradually transition to interactivity, Digital Ready boards provide a modularized path with immediate and long-term benefits.

Benefits
- Lowers total whiteboard investment cost – install digital ready boards now and convert to fully integrated Solution™ boards as funds become available
- Simplifies installation
- Provides flexibility in planning and paying for interactive classrooms/training rooms
- Standardizes and simplifies facility planning process
- Ensures both long and short-term capture needs
- Low gloss porcelain surface projects well while functioning as a dry-erase writing surface, outperforming traditional interactive boards
- Protects investment – 50 year surface guarantee surpasses competition
- GREENGUARD certified markerboards help achieve clean air in schools, offices, hospitals and other public facilities

1. Digital Ready Markerboard
2. eBeam Digital Upgrade
3. Fully featured Digital Ready board allows interactive note capture, live annotations, remote meetings and more

Award-winning eBeam Technology and a Claridge Markerboard for every Classroom and Conference Room
With pre-built partitions for cords and cables designed into the board trim. Digital Ready Markerboards combine sleek design with installation ease. The multi-purpose whiteboards provide a rock-solid surface for handwritten notes. Once a facility decides to add interactive features, Claridge’s simple eBeam Digital Upgrade transforms boards into lively collaboration spaces in minutes.

Schools and offices can now purchase and install just one markerboard for all visual display needs.

With the Digital Upgrade, users have the ability to mark up anything projected from a computer and enliven PowerPoint presentations, documents and web pages.

Every annotation on the board is captured so important ideas are never lost and notes can be shared over the Internet in real time, sent via email, or edited at a later date. For educators, a library of items provides rich content for presentations. Graphics, photographs and animation that help engage participants can be easily dragged and dropped onto a presentation. Users can choose the file format that works best – including jpeg, pdf and Microsoft Power Point – to share presentations and lessons.

The Digital Ready Markerboard from Claridge is solid steel, with a fusion bonded porcelain surface that provides a combination writing and projection surface that is scratch and stain-resistant. Low-gloss, colorfast and magnetic, the porcelain surface is guaranteed for 50 years or the life of the building. Claridge’s LCS-II porcelain surface has achieved both GREENGUARD Indoor Air Quality™ and GREENGUARD Children and Schools™ certifications.

With buy-now, upgrade-later abilities, a durable, multi-function whiteboard surface and limitless presentation capabilities, Digital Ready Markerboards offer form, function and affordability.

| 1 traditional whiteboard + installation costs |
| + 1 interactive whiteboard + installation costs |
| = 2 boards and 2 installations |

| 1 multi-purpose digital-ready board |
| + 1 installation |
| = substantial cost and time savings |

“Learning styles, interests, and backgrounds differ greatly from one student to the next. As a teacher, it’s my goal to level the learning field, and [my Solution markerboard with eBeam technology] allows me to do that.”

Jeff Caswell
Seventh-Grade Math Teacher
Arlington Middle School
Arlington, Tennessee
